*This form should be completed and submitted by the Club's Chief Executive, Director of Rugby or Medical Officer.

In accordance with paragraph 9.4 of the RFU Illicit Drugs Policy and the player's consent signed below, we hereby request that a pre-employment illicit drugs test be conducted by the RFU on the above named prospective player through analysis of a sample of (delete) HAIR and/or URINE.

The required payment* of £..... is enclosed herewith.

(*The test fee should be checked in advance with the RFU Acting Illicit Drugs Programme Manager stephenwatkins@rfu.com and advance payment must accompany this request. Cheques payable to RFU.)

(For and on behalf of Club)

PLAYER CONSENT

I hereby agree to submit to a pre-employment illicit drugs test as outlined above in relation to my proposed contract to play for the club. I agree that I shall comply with the requirements of the RFU appointed Sample Collection Officer who shall follow the sample collection process outlined in Schedule 2 of the RFU Illicit Drugs Policy. I acknowledge that if necessary any hair sample which requires to be collected includes body hair. I further agree to the test results being sent by the RFU Testing Agent to the RFU Programme Manager who shall share the results with the club and, in the event of an Adverse Analytical Finding, with the Programme Review Group. I acknowledge that this pre-employment test shall be classed as a "monitoring sample" and that the test results shall not be sanctionable under the RFU Illicit Drugs Policy, or any other testing policy, and shall be used for the purpose of assessing my suitability as a prospective player for the club. I acknowledge that an Adverse Analytical Finding for any illicit drug will be grounds for me being subject to target testing at any future date under the RFU Illicit Drugs Policy. I acknowledge that I shall be contacted by the RFU appointed Testing Agent to arrange a suitable time and place for the sample collection and that I must make myself available within 5 days of being contacted by the Testing Agent.
